

MILLENNIUM WOOD

Canopy needs lifting, trees thinning out and footpath at side needs cutting back	Could the waterlogged area be looked at The run off from the fields used to go into the ditches at the back of MW and there was a natural pond which had frogs and toads. It would be a good wetland area
Needs cutting back between trees for visibility. Paths suitable for wheelchairs/pushchairs	To keep the peaceful walks. To rewind the areas. More plants/bird corners, water area. To leave to rewild. Its a wood-great for wildlife
Millennium Wood is a lovely space to walk through but does need to be maintained regularly to keep paths safe	Millennium Woods-What we love and value. Precious nature, quiet walks, trails throughout, watching changing seasons. access to wider countryside, The existing wood as it is, the mud What we'd love to see- A 5 and 10 k running trail, information boards referring to wildlife flowers, trees, birds, fungi. Designated picnic area in the woods, foraging sessions

MILLENNIUM WOOD

Improve the lighting

The Millennium Wood is beautiful. It has been cleared of rubbish over the years and the volunteers have done a good job taking out saplings, Planting new hedging and bulb planting. Various grants over the years have led to much maintenance work. Love the Millennium Wood sign and the new marker posts for the official paths. Good description on the website of the work being carried out in the woodland. Meadow area is cut annually and the Barn Owl box has been occupied for last 3 years. Bird and Bat boxes seen in the woodland and all are monitored. Love reading the reports on the Biodiversity Action Plan

A scouts bush craft area for dens and survival activities

MILLENNIUM WOOD

Woods would benefit from better access for all abilities

Love the Millennium Wood. We walk the dog here most days. Brilliant to have an off lead area for him to meet other canine companions. This is our favourite open space in Farnsfield at all times of the day. A little sanctuary for everyday life. Please don't damage anything in this area. It is so well care for and maintained. Thanks to everyone

A pond, Have a boardwalk over wet areas

I'm a regular user of the Woodland. Walking, I love the variety, clearings, wilder woods and more sparsely populated areas. A great facility

Simple rustic benches

Is there any way we can mow the routes outside the woodlands so people can walk round it?

Trees, nature, areas to enjoy, accessible paths, quiet and peaceful, bug hotels, bird and bat boxes

Love the wood would be good to have more structure and species diversity within it. Make more of the wet area in North West area a pond could be lined hold water for longer

I enjoy walking in these woods especially now paths have been widened and wood chipped. Love these woods

Better access for prams. Footpaths should be well cared for and bushes trimmed

Trees, Birds, Wildlife haven, Quiet and peaceful. Paths with chipped wood more agreeable. Seating area. Poo bag bins, Native flowers
